# THE BATTLE AGAINST COVID-19

**Regular cleaning plays a vital role in limiting the transmission of COVID-19.**

Transmission of the novel coronavirus mainly occurs through respiratory droplets generated during breathing, talking, coughing, and sneezing. These droplets can directly infect the respiratory tracts of other people if there is close contact. They can also infect others indirectly.

Schools, Pre-schools and nurseries alongside healthcare settings, are highly susceptible areas of transmission and therefore should be cleaned more frequently.

As a minimum door handles, handrails, tabletops, play equipment, toys, and electronic devices (such as phones) should be wiped down twice a day; Ideally at the at the beginning and the end of the working day.

*If you present with a child, staff member or visitor who tested positive or is / was symptomatic at your school, nursery etc, all surfaces should be cleaned, disinfected, including all potentially contaminated and frequently touched areas such as bathrooms, door handles, telephones, hand rails in corridors and stairwells. When items cannot be cleaned using detergents or laundered, for example, upholstered furniture and mattresses, steam cleaning should be used.*

*iCLEAN takes the hassle and stress out of deep cleaning before and after your working day.*

*iCLEAN is easy to use and complies with government's guidance in decontamination dilution requirements of 1,000 parts per million available chlorine (ppm av.cl.)*

# Safeguarding their future

THE BENEFITS OF iCLEAN TECHNOLOGY

# Time efficient

can be used in a  
variety of settings

Has three nylon nozzles  
that are  
efficient and convenient

3 flow level adjustments

# Easy to use

Tank capacity  
of 4L.

220V 50Hz  
with 5 meter  
power cord

Droplet reachable  
distance of  
15 meters.

# Various spray sizes

# adjustable angles
